

Improve and maintain water quality for aquaculture

PRO GROWTH®

APOLLON (GRANULE)

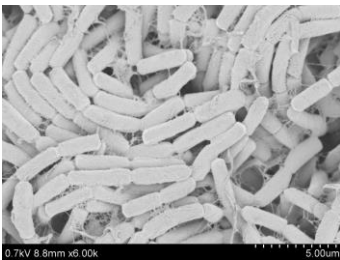

- Highly concentrated bacteria cell granulate.
- After the air activation the bacteria becomes rod cell with cell length of 2-3µm and width of 0.7-0.8µm.
- The bacteria coexists with other useful bacterias.

◎Improves water quality

◎Improves mud at the bottom

◎Suppresses vibrio

◎Suppresses molds

**Sprinkle directly in the breeding tank and aquaculture pond.
Please adjust the quantity and frequency according to the usage condition.**

**There is no problem if the domestic organism feeds.
(Certified as a mixed feed and its active ingredients)**
